**Job (continued)**

|                   |  |
|-------------------|--|
| DOC <sup>36</sup> | Show documentation text                                    |
| EDJ               | Edit JCL member  |
| EXE               | Run job outside of AJM's control                           |
| EXT               | Extract definition into a dataset                          |
| FOR               | Show next start time of job                                |
| JLG <sup>6</sup>  | Call joblog management system (e.g. SDSF)                  |
| LCK               | Lock job   |
| NTF               | Show notification message definitions                      |
| OUT <sup>6</sup>  | Call output management system (e.g. AJM/S)                 |
| OU2 <sup>6</sup>  | Call alternate output management system (e.g. Beta92)      |
| RES               | Delete datasets from last job run                          |
| ROJ <sup>6</sup>  | Show JCL of last job run                                   |
| RUN               | Start job (affects other jobs, but not next schedule time) |
| SHJ <sup>6</sup>  | Show prepared JCL  |
| STA <sup>6</sup>  | Show current job status                                    |
| STR               | Start job (affects other jobs and next schedule time)      |
| STT <sup>6</sup>  | Show statistics  |
| UNL               | Unlock job   |

---

**JCL and temporary JCL line**

|     |                   |
|-----|-------------------|
| BRJ | Browse JCL member |
| EDJ | Edit JCL member   |

---

**Logical resource**

|     |  |
|-----|--|
| SUC | Set use counter                        |
| WHO | Display current users of this resource |

---

**JCL definition**

|     |                                    |
|-----|------------------------------------|
| CLR | Clear link name (reset "in error") |
| LCK | Lock link name                     |
| UNL | Unlock link name                   |

---

**Calendar**

|     |                         |
|-----|-------------------------|
| SDS | Set daytype switch time |
|-----|-------------------------|

---

**Node**

|     |                             |
|-----|-----------------------------|
| CLR | Clear node                  |
| LCK | Lock node                   |
| STA | Show current status of node |
| UNL | Unlock node                 |

---

**Path**

|     |                             |
|-----|-----------------------------|
| LCK | Lock path                   |
| STA | Show current status of path |
| UNL | Unlock path                 |

---

**AJM/P Preparation dialog<sup>3</sup>**

|     |                            |
|-----|----------------------------|
| PRP | Execute preparation dialog |
| PRU | Update preparation dialog  |
| PVR | Set preparation invalid    |
| PVS | Set preparation valid      |
| STT | Show statistics            |

---

**AJM/P Variable<sup>3</sup>**

|     |                 |
|-----|-----------------|
| STT | Show statistics |
| VIE | Test variable   |

# AJM

## Command Overview

AJM Release 4.1

Last update: 01/13

©T-Systems Enterprise Services, 2013

---

**PF Key Settings**

|          |  |
|----------|--|
| HELP     | (PF1)                                    |
| SPLIT    | (PF2)                                    |
| END      | (PF3) End dialog; save data if necessary |
| RETURN   | (PF4) End current dialog                 |
| RFIND    | (PF5)                                    |
| RCHANGE  | (PF6)                                    |
| UP       | (PF7) Scroll up                          |
| DOWN     | (PF8) Scroll down                        |
| SWAP     | (PF9)                                    |
| RETRIEVE | (PF12)                                   |

---

**Common Commands**

|                   |   |
|-------------------|---|
| BRW <sup>1</sup>  | Switch to browse mode                                       |
| UPD <sup>2</sup>  | Switch to update mode                                       |
| SAVE <sup>1</sup> | Save changes  |
| CANCEL / CAN      | Return to previous panel (changes will not be saved)        |
| END               | Return to previous panel (changes will be saved)            |
| RETURN            | End current dialog (changes will not be saved)              |
| EXIT              | Leave AJM administration dialog (changes will not be saved) |
| UP                | Scroll up   |
| DOWN              | Scroll down   |
| FIND / F          | Search for character string                                 |
| RFIND             | Repeat previous FIND command                                |
| CHANGE / C        | Change character string                                     |
| RCHANGE           | Repeat previous CHANGE command                              |
| CNT               | Count entries in list                                       |
| SRVTIME           | Time information of AJM server                              |

---

<sup>1</sup> only in update mode<sup>2</sup> only in browse mode

---

**Jump Commands**

|                       |                              |
|-----------------------|------------------------------|
| MAI / MAIN            | Main menu                    |
| PRF                   | Session options (Profile)    |
| NET                   | Net / job processing         |
| JVR                   | Job variables                |
| LRS                   | Logical resources            |
| DST                   | Dataset triggers             |
| JCD                   | JCL definitions (link lists) |
| CAL                   | Calendars                    |
| FOR                   | Forecast                     |
| XSD                   | External systems             |
| PRP <sup>3</sup>      | AJM/P Preparation dialogs    |
| PVR <sup>3</sup>      | AJM/P Variables              |
| PCD <sup>3</sup>      | AJM/P Datasets               |
| LOG                   | Logging                      |
| DBI                   | Group-specific statistics    |
| UTI                   | Utilities                    |
| INF <sup>4</sup>      | System Information           |
| SWS / SW <sup>4</sup> | Software status              |
| PRM <sup>4</sup>      | Parameters                   |

---

**Common Line Commands**

|         |  |
|---------|--|
| BRW / B | Display object in browse mode              |
| DEL / D | Delete the object                          |
| INS / I | Add a new object                           |
| REP / R | Add a new object (with identical contents) |
| SEL / S | Display object in browse mode              |
| UPD / U | Update the object                          |
| LOG     | Display log information about this object  |
| PRT     | Print this object                          |
| LC      | Set value to lowercase                     |
| UC      | Set value to uppercase                     |

---

<sup>3</sup> only with AJM/P<sup>4</sup> Master authorization required

---

**Filter**

|     |                   |
|-----|-------------------|
| CAN | End active dialog |
|-----|-------------------|

---

**Net**

|                  |  |
|------------------|--|
| CLR              | Perform manual net clear   |
| DAC <sup>3</sup> | Show action text   |
| DCU <sup>3</sup> | Update documentation / action texts                              |
| DEX <sup>3</sup> | Extract documentation into a dataset                             |
| DOC <sup>3</sup> | Show documentation text  |
| EXT              | Extract definition into a dataset                                |
| FOR              | (forecast) Show next start times of jobs                         |
| LCK              | Lock all jobs of this net  |
| NTF              | Show notification message definitions                            |
| PLS              | Check definition for plausibility                                |
| PRP <sup>3</sup> | Execute preparation dialog                                       |
| PRU <sup>3</sup> | Update preparation dialog  |
| PUL <sup>3</sup> | Release preparation lock   |
| PVR <sup>3</sup> | Set preparation invalid  |
| PVS <sup>3</sup> | Set preparation valid  |
| REX <sup>5</sup> | Execute restart with the displayed (modified) restart definition |
| RMO              | Modify restart definition  |
| RSI              | Simulate restart   |
| SEL              | Display list of jobs in this net                                 |
| STT              | Show statistics of the last net run                              |
| UNL              | Unlock all jobs of this net                                      |

---

**Job**

|                   |  |
|-------------------|--|
| BRJ               | Browse JCL member                          |
| BRN               | Bypass with unconditional start (i.e. RUN) |
| BYP               | Bypass job at next selection               |
| CLR               | Perform manual job clear                   |
| DAC <sup>36</sup> | Show action text                           |
| DCU <sup>36</sup> | Update documentation / action texts        |
| DEX <sup>36</sup> | Extract documentation into a dataset       |

---

<sup>5</sup> only within manual restart processing<sup>6</sup> also in Job update panel
